

Meet THG Energy

YOUR PARTNER IN SUSTAINABILITY, ENERGY DATA & TECHNOLOGY

- Are you working towards requirements for **GHG emissions reporting** mandates?
- Are you looking for help with **energy & utility data management**?
- Are you running into challenges collecting and standardizing energy data being used for **sustainability reporting, benchmarking, and budgeting**?
- Are you trying to come to terms with fluctuating costs for energy, and looking for tools and services that can help you **navigate historical and ongoing information**?
- Are you looking for **opportunities to improve** (or for a place to start) with any of the above initiatives?

THG Energy Wants to Help

THG provides energy management solutions and services that benefit organizations regardless of where they're at in their energy management journey. We start with invoice & energy data collection and centralization, and support a suite of dynamic reports and services for various stakeholders. Our solutions reduce duplicative tasks, provide key insights through intuitive reporting on usage, cost, and emissions, and enable advanced energy management and demand response strategies that help our customers achieve savings while benefitting from organized and centralized data.

Our practical approach streamlines time-intensive processes, creates efficiencies for all stakeholders, and highlights areas that either have room for improvement, or have achieved savings from your renewed efforts.
